FOUNDING EDITOR-IN-CHIEF
Chris Payne

Aims and Scope:

Biocontrol Science and Technology presents original research and reviews in the fields of biological pest, disease and weed control. The journal covers the following areas: animal pest control by natural enemies; biocontrol of plant diseases; weed biocontrol; 'classical' biocontrol; augmentative releases of natural enemies; quality control of beneficial organisms; microbial pesticides; properties of biocontrol agents, modes of actions and methods of application; physiology and behaviour of biocontrol agents and their interaction with hosts; pest and natural enemy dynamics, and simulation modelling; genetic improvement of natural enemies including genetic manipulation; natural enemy production, formulation, distribution and release methods; environmental impact studies; releases of selected and/or genetically manipulated organisms; safety testing; the role of biocontrol methods in integrated crop protection; conservation and enhancement of natural enemy populations; effects of pesticides on biocontrol organisms; biocontrol legislation and policy; registration and commercialization.

Manuscripts to be considered for publication which cover topics using insects and mites for biocontrol (other than weed biocontrol) should be submitted directly to the Editor dealing with this subject area: Dr. Charles H. Pickett, Biological Control Program, California Department of Food & Agriculture, 3288 Meadowview Road, Sacramento, CA 95832, USA, CPickett@cdfa.ca.gov. Those covering plant disease biocontrol and use of pathogens for weed control should be submitted directly to the Editor dealing with this subject area: Quirico Migheli, Dipartimento di Protezione delle Piante, Università degli Studi di Sassari, Via Enrico De Nicola 9, I-07100 Sassari, Italy, qmigheli@uniss.it. All other manuscripts should be submitted to the Editor-in-Chief: Dr M. S. Goettel, Lethbridge Research Centre, Agriculture & Agri-Food Canada, PO Box 3000, 5403-1st Avenue South, Lethbridge, Alberta, Canada T1J 4B1, goettel@agr.gc.ca.

Abstract and indexing services: *Biocontrol Science and Technology* is currently noted in *AGRICOLA, AgroAsia, BIOSIS, Biotechnology Abstract, Biotechnology Citation Index, CAB Abstracts, Current Contents/Agriculture, Biology & Environmental Sciences, Ecological Abstracts, Elsevier BIOBASE/Current Awareness in Biological Sciences, Entomology Abstracts, Essential Biosafety*/AGBIOS, GEOBASE, *Geographical Abstracts Human Geography, Human Resources Abstracts, International Development Abstracts, Pest Management Focus, Research Alert, Science Citation Index, Science Citation Index Expanded*™, *SciSearch, SCOPUS* and *World Agricultural Database*.

RESEARCH ARTICLES

A. Elzein, J. Kroschel & V. Leth. Seed treatment technology: An attractive delivery system for controlling root parasitic weed *Striga* with mycoherbicide 3

E. N. Rosskopf, C. B. Yandoc & R. Charudattan. Genus-specific host range of *Phomopsis amaranthicola* (Sphaeropsidales), a bioherbicide agent for *Amaranthus* spp. 27

R. N. Wiedenmann & J. W. Smith, Jr. Use of ablated stalks to assess field rates of parasitism of *Diatraea saccharalis* (Lepidoptera: Crambidae) by *Cotesia flavipes* (Hymenoptera: Braconidae) 37

J. J. Muturi, A. J. Ngi-Song, J. M. Mueke, M. Sétamou, F. Schulthess & N. Jiang. Multiparasitism by the pupal parasitoids, *Xanthopimpla stemmator* (Hymenoptera: Ichneumonidae) and *Pediobius furvus* (Hymenoptera: Eulophidae) on two African cereal stemborers, *Chilo partellus* (Lepidoptera: Crambidae) and *Busseola fusca* (Lepidoptera: Noctuidae) 49

M. A. Jackson, S. Erhan & T. J. Poprawski. Influence of formulation additives on the desiccation tolerance and storage stability of blastospores of the entomopathogenic fungus *Paecilomyces fumosoroseus* (Deuteromycotina: Hyphomycetes) 61

J. D. Harwood & J. J. Obrycki. The detection and decay of Cry1Ab Bt-endotoxins within non-target slugs, *Deroceras reticulatum* (Mollusca: Pulmonata), following consumption of transgenic corn 77

T. J. Friesen, G. Holloway, G. A. Hill & T. S. Pugsley. Effect of conditions and protectants on the survival of *Penicillium bilaiae* during storage 89

SHORT COMMUNICATION

D. Skirvin, L. Kravar-Garde, K. Reynolds, J. Jones & M. De Courcy Williams. The influence of pollen on combining predators to control *Frankliniella occidentalis* in ornamental chrysanthemum crops 99

D. G. James. Methyl salicylate is a field attractant for the goldeneyed lacewing, *Chrysopa oculata* 107

NUMBER 2

REVIEW

A. Pervez & Omkar. Ecology and biological control application of multicoloured Asian ladybird, *Harmonia axyridis*: A review 111

RESEARCH ARTICLES

N. K. Maniania, S. Ekesi, A. Odulaja, M. A. Okech & D. J. Nadel. Prospects of a fungus-contamination device for the control of tsetse fly *Glossina fuscipes fuscipes* 129

S. Arthurs & K. M. Heinz. Evaluation of the nematodes *Steinernema feltiae* and *Thripinema nicklewoodi* as biological control agents of western flower thrips *Frankliniella occidentalis* infesting chrysanthemum 141

E. M. Dougherty, N. Narang, M. Loeb, D. E. Lynn & M. Shapiro. Fluorescent brightener inhibits apoptosis in baculovirus-infected gypsy moth larval midgut cells *in vitro* 157

K. R. Sime, K. M. Daane, H. Nadel, C. S. Funk, R. H. Messing, J. W. Andrews Jr, M. W. Johnson & C. H. Pickett. Diachasmimorpha longicaudata and *D. kraussii* (Hymenoptera: Braconidae), potential parasitoids of the olive fruit fly 169

S. Mennan, S. Chen & H. Melakeberhan. Suppression of *Meloidogyne hapla* populations by *Hirsutella minnesotensis* 181

H. Makee. Effect of host egg viability on reproduction and development of *Trichogramma cacoeciae* and *T. principium* (Hymenoptera: Trichogrammatidae) 195

M. Otim, J. Legg, S. Kyamanywa, A. Polaszek & D. Gerling. Population dynamics of *Bemisia tabaci* (Homoptera: Aleyrodidae) parasitoids on cassava mosaic disease–resistant and susceptible varieties 205

SHORT COMMUNICATION

G. Dal Bello, S. Padin, P. Juárez, N. Pedrini & M. De Giusto. Biocontrol of *Acanthoscelides obtectus* and *Sitophilus oryzae* with diatomaceous earth and *Beauveria bassiana* on stored grains 215

NUMBER 3

RESEARCH ARTICLES

C. Uma Maheswara Rao, K. Uma Devi & P. Akbar Ali Khan. Effect of combination treatment with entomopathogenic fungi *Beauveria bassiana* and *Nomuraea rileyi* (Hypocreales) on *Spodoptera litura* (Lepidoptera: Noctuidaeae) 221

Omkar, A. Pervez & A. K. Gupta. Why do neonates of aphidophagous ladybird beetles preferentially consume conspecific eggs in presence of aphids? 233

P. Bussaman, R. W. Sermswan & P. S. Grewal. Toxicity of the entomopathogenic bacteria *Photorhabdus* and *Xenorhabdus* to the mushroom mite (*Luciaphorus* sp.; Acari: Pygmephoridae) 245

B. Guijarro, I. Larena, P. Melgarejo & A. De Cal. Effect of drying on conidial viability of *Penicillium frequentans*, a biological control agent against peach brown rot disease caused by *Monilinia spp.* 257

G. L. Graham, G. Peng, K. L. Bailey & F. A. Holm. Effect of dew temperature, post-inoculation condition, and pathogen dose on suppression of scentless chamomile by *Colletotrichum truncatum* 271

S. Zhang, D. A. Schisler, M. A. Jackson, M. J. Boehm, P. J. Slininger & Z. L. Liu. Cold shock during liquid production increases storage shelf-life of *Cryptococcus nodaensis* OH 182.9 after air-drying 281

Omkar, A. K. Gupta & A. Pervez. Attack, escape and predation rates of larvae of two aphidophagous ladybirds during conspecific and heterospecific interactions 295

G. W. Bourdôt, J. Barton, G. A. Hurrell, A. F. Gianotti & D. J. Saville. *Chondrostereum purpureum* and *Fusarium tumidum* independently reduce regrowth in gorse (*Ulex europaeus*) 307

Number 4

RESEARCH ARTICLES

A. E. Hajek, B. Huang, T. Dubois, M. T. Smith & Z. Li. Field studies of control of *Anoplophora glabripennis* (Coleoptera: Cerambycidae) using fiber bands containing the entomopathogenic fungi *Metarhizium anisopliae* and *Beauveria brongniartii* 329

G. W. Bourdôt, D. Baird, G. A. Hurrell & M. D. De Jong. Safety zones for a *Sclerotinia sclerotiorum*-based mycoherbicide: Accounting for regional and yearly variation in climate 345
